## Your Personal Rate of Return

This Period	2.0%
Year to Date	9.0%

Your Personal Rate of Return is calculated with a time-weighted formula, widely used by financial analysts to calculate investment earnings. It reflects the results of your investment selections as well as any activity in the plan account(s) shown. There are other Personal Rate of Return formulas used that may yield different results. Remember that past performance is no guarantee of future results.

## Your Asset Allocation

Stocks	26%
Bonds	58%
Short-Term	16%

Your investments are currently allocated among the displayed asset classes. Percentages and totals may not be exact due to rounding.

## Market Value of Your Account

This section displays the value of your account for the period, in both shares and dollars.

Planning for Retirement in a Down Market

It's understandable that recent market volatility, which may be reflected in your quarterly statement, may have created feelings of uncertainty. Here are a few things to keep in mind:
